Summary

Results-driven Full Stack Java Developer and MCA student with hands-on experience in building secure, scalable, and user-focused web applications. Proficient in Java, Spring Boot, React.js, and cloud-integrated architectures with exposure to multi-tenant SaaS design, REST API development, and DevOps tooling. Delivered 5+ academic and personal projects demonstrating strong problem-solving skills and real-world software development experience.

Projects

HOD Management System

Java | Spring Boot | MySQL | REST API | Hibernate

- Engineered a role-based web application with secure authentication and authorization flows, reducing unauthorized access risk by enforcing strict permission boundaries across 3+ user roles.
- Designed and implemented 10+ REST API endpoints with full CRUD operations backed by an optimized MySQL schema, improving data retrieval performance through indexed queries.
- Integrated Hibernate ORM with Spring Boot to build a clean, maintainable backend architecture, cutting boilerplate data-access code by approximately 40% compared to raw JDBC.

Multi-Tenant Real Estate SaaS Platform

Spring Boot | React.js | MySQL | Docker | Swagger

- Architected a scalable multi-tenant SaaS backend serving multiple real estate businesses through a shared infrastructure with fully isolated tenant data, supporting extensibility for 10+ concurrent tenants.
- Developed secure, documented REST APIs using Swagger/OpenAPI, reducing integration time for front-end consumers and enabling efficient API testing workflows.
- Implemented cloud integration and database optimization strategies including connection pooling and query tuning, improving system throughput and reducing average query latency by an estimated 30%.

Education

Vidya Pratishthan's Institute of Information Technology, Baramati, Pune
Master of Computer Applications (MCA) – Computer Programming & Applications

June 2025 – April 2027

Vidya Pratishthan's College of Education, Baramati, Pune
Bachelor of Computer Science (BCS)

June 2022 – July 2025

Certifications

- Java Full Stack Developer** – Capgemini
- Fundamentals of AI** – VP Sharadchandra Pawar Center of Excellence in AI

Technical Skills

Languages:	Java, Python, SQL, JavaScript
Frameworks:	Spring Boot, Hibernate, React.js
Databases:	MySQL, JDBC
DevOps & Tools:	Docker, Git, GitHub, Swagger/OpenAPI
Concepts:	REST APIs, Multi-Tenant Architecture, CRUD, ORM, Authentication & Authorization
